ALBUQUERQUE PUBLIC SCHOOLS' POSITION ON E-RATE APPEAL

The Albuquerque Public School District ("APS") requests Commission review of the March 24, 2003, Funding Commitment Decision Letter issued by the Schools and Libraries Division ("SLD") of the Universal Service Administrative Company .

Funding Request Numbers: 856741, 856765 and 856797

APS' Form 470 allows for competitive bidding on an existing program

Contrary to the denial of funding letter
the services requested were competitively bid

- The State of New Mexico has, through a competitive procurement process, obtained pricing agreements for use by all branches of the state government (state agencies, local public bodies, school districts, etc.)
- APS, after complying with FCC rules on submitting and posting Form 470, was able to use one of the selected vendors to achieve cost-effective and cost-efficient acquisition of quality products and services needed to implement its technology plan.
- APS' students should not be deprived of much-needed technology assistance due to the SLD's interpretation of statewide and local New Mexico procurement practices.
- If the SLD has now decided to reject previously accepted competitive bidding practices, its new standard should be clearly articulated and applied only prospectively.
- The ad hoc, retroactive prohibition that the SLD has applied to APS unfairly prejudices some of the nation's poorest students and is not in the public interest

The APS' requested funding is
not designed to implement any "major new initiative."

- APS approved a Technology Master Plan ("TMP")
- The SLD had previously granted funding to APS to implement the TMP
- The requested funding is necessary to implement the next step in the TMP

APS filed a comprehensive Form 470 requesting specific services

- A review of Form 470s from other school districts reveals that several districts, whose requests for funding *were* granted, submitted virtually identical descriptions in their 470s.
 - The SLD also approved funding for a number of school districts whose Form 470s contained much broader and less specific service descriptions than APS
-
